SPEAKERS:

Peri Husen M.D. UK Essen, Essen (DE)
Prof. Ina Jochmans UZ Leuven, Leuven (BE)
Prof. Henry Pleass Westmead Hospital, Sydney (AU)

Dear Colleagues,

We would like to invite you to XVIVO's webinar series for transplantation of abdominal organs. The first webinar will highlight **Kidney Machine Perfusion**. This 2 hour webinar will get you up to speed with the latest information, possibilities and learn more about clinical protocols for kidney machine perfusion. To get a brief overview of the topic, see below.

The topics that will be covered during this webinar include:

- Kidney perfusion - a brief introduction
- Is End-ischemic kidney perfusion good enough?
- Hypothermic Oxygenated Perfusion for better results
- What does Normothermic Machine Perfusion has to offer?

Following each presentation there will be a Q&A session, and to summarize the webinar there will be a panel discussion moderated by Dr Cyril Moers, UMC Groningen, Groningen The Netherlands.

*Back in September we shared the news that XVIVO acquired Organ Assist. For the past 2 decades both companies have worked in parallel towards the same mission, to develop technology that would allow more organs to be utilized for transplantation. Now, with joint forces we will continue to strive towards our vision **Nobody should die waiting for a new organ.***

Sincerely,
XVIVO Perfusion Marketing & Sales Team
